ABOUT US

Jemimah Nig. Ltd was Incorporated in 1991 as a small company trading in household pumps, Jemimah has grown into a well organized corporate organization with fully fledged offices and showrooms in four major Nigerian cities. Jemimah is partnered with various OEM's around the world to ensure we provide the best quality products to the Nigerian fluid sector.

Jemimah Nig. Ltd is poised to be the leading provider of fluid solutions technology in Nigeria. We are inspired to achieve this through committed associations. We strive to be the most innovative ,competitive and efficient in providing a product mix of pumps, tanks, treatment solutions, etc to the Nigerian market

MISSION

Jemimah Nig Limited strives to be the most competitive in price, quality and service delivery ,providing a product mix of pumps, tanks, treatment solutions, etc to the Nigerian market.

VISION

To be the most reliable company in the area of fluid solutions to the Nigerian market.

Product &Services

- Pumping Solutions
- Solar Borehole Pumps
- Blowers
- Filter Media for Water Treatment
- Pressure Vessels & Boilers
- Sewage And Water Treatment
- Ashirvad UPVC Riser/Drop Pipes for Borehole
- Valves
- Water Storage Tanks (Grp / Pressed Steel)
- Ppr Pipes & Accessories
- Electric Motors
- Sanitary Wares
- Bare Shaft Pumps

- Installation
- Commissioning
- Maintenance

LOWARA PUMPING SOLUTIONS

Partnered with Xylem's Lowara and a host of other reputable pump manufacturers. We provide pumps that are created using unique innovation processes geared towards meeting the needs of the Nigerian region. The service and its accompanying products not only improve the water we use, it help us conserve water for re-use both now and in the future.

LOWARA
a xylem brand

We offer pumps for the following applications;

- Water Transfer (Single & Booster)
- Fire-Fighting (Hose reel, Hydrant & Sprinkler)
- Submersible (Borehole)
- Submersible (Drainage & Sewage)
- Multistage (Horizontal & Vertical)
- Circulators, Genyo (Electronic Controller) & Hydrovar (Intelligent Electronic Controller)

TECHNO POMPE

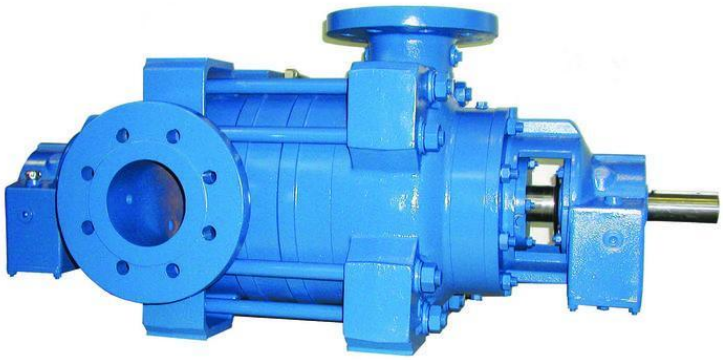

Partnered with Italy's finest engineering heritage, Techno Pompe delivers pump solutions that merge Italian precision with Nigerian ingenuity. Our pumps are crafted through advanced innovation processes designed to meet the unique environmental and infrastructural needs of Nigeria. Each product embodies reliability, efficiency, and adaptability — ensuring optimal water management across industries and communities.

We offer pumps for the following applications;

- Water Transfer (Single & Booster)
- Submersible (Borehole)
- Submersible (Drainage & Sewage)
- Multistage (Horizontal & Vertical)
- Circulators, Genyo (Electronic Controller) & Hydrovar (Intelligent Electronic Controller)
- Swimming pool
- Irrigation
- Diesel

ELECTRIC MOTORS & BARE SHAFT PUMPS

ELECTRIC MOTORS

Partnered with leading OEM's in the industry. We offer a wide range of electric motors; from the standard surface to submersible and even EXPLOSION-PROOF. In sizes 2.2kW up to 132kW and speed of 1450 rpm to 2990 rpm. The motors we offer are developed, designed and manufactured into total-enclosed self fan cooling cases. They are highly efficient and maximise safety.

BARE SHAFT PUMPS

Based on customer specification and demand we also stock bare shaft pumps ranging from DN 32 up to DN 200. Covering brands from Lowara to Ebara.

SHIMGE PUMP INDUSTRY GROUP CO. LTD

Specialized in the production and operation of pumps and control equipment that have passed ISO 14001 & OHSAS 18001 certification. Shimge pump Industry Co. Ltd have introduced excellent performance management in line with GB/T 19580 and established a sound quality assurance system. Shimge has passed GS, CE and UL certification and met the specification of the ROHS directive

VERTICAL MULTISTAGE CENTRIFUGAL PUMPS

HORIZONTAL MULTISTAGE CENTRIFUGAL PUMPS

SG(m)3" DEEP WELL PUMP

SHF(m) CENTRIFUGAL PUMP

QDX -L SEWAGE PUMP

Some of the models we currently stock;

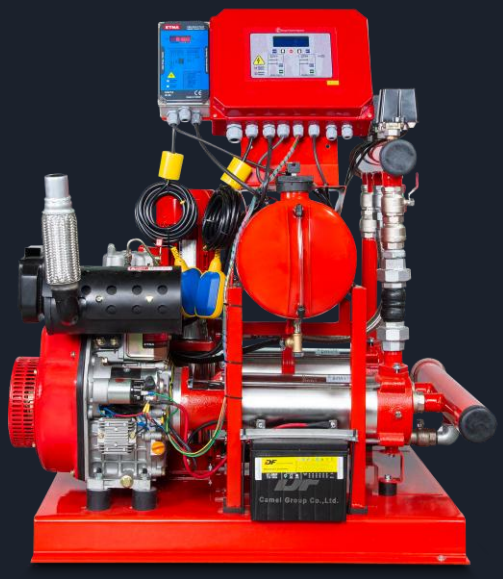

- 4SGM 8/18 (3HP) submersible borehole pump
- 4GS 16/24 (10HP)submersible borehole
- WSD 75/35 (1HP) single-phase sewage pump
- WQAS 25-7-1.5CB (2.2HP) cutter pump
- SHF 30B (7.5HP) surface pump
- SGT 32-200/7.5 (10HP) surface pump

ETNA

We distribute ETNA manufactured in-line dry rotor circulation pumps, end-suction norm pumps, horizontal-vertical multilevel centrifugal pumps, waste water drainage pumps, water booster systems for residential and commercial buildings, fire pumps and water booster systems in line with TS EN 12845+A2 and NFPA20 standards.

FIRE PUMP SYSTEM NFPA 20 STANDARD

FIRE FIGHTING BOOSTER

FIRE PUMP SYSTEM EN 12845 STANDARD

Products available;

- Commercial / Residential Booster System
- Sewage pumps
- Drainage pumps
- Firefighting System

EPH SERIES WATER BOOSTER SYSTEM

SOLAR BOREHOLE BY SOLARTECH CHINA

Solartech is a world leading borehole pump manufacturer. The pumping device consists of a solar pumping inverter as well as a deep well pump, mainly used for agriculture irrigation, desert control, pasture animal husbandry, city water landscaping , seawater desalination , living water supply etc.

The pumps use solar energy, need no connection to grid, operate automatically, maintenance is cheap, easy to install and move, have high universality, are clean and green, and have high economic benefits.

Solartech solar pump kit is also known as solar water pumps, solar pond pump, solar borehole pump, solar fountain pumps, solar powered water pump, solar irrigation pump, solar deep well pump, and solar submersible pump.

WATER TREATMENT

We design, assemble, install and maintain water treatment plants of different complexities. Each designed to provide quality drinking water that meets World Health Organization (W.H.O) Standards. From your skid mounted treatment plants, with all accessories to your low price, quality & efficient smaller units for residential water treatment

- The methods of treatment and process differs with each plant. The process include but aren't restricted to filtration, chlorination, ultra violet sterilization and any other process as required / specified by the engineers to effectively turn raw water to clean water.
- We also provide Packaged Reverse Osmosis Systems.

FILTER MEDIA FOR WATER TREATMENT

Aqua-TECHNIEK BV are the top filtration professionals in the Netherlands. The product range cover high & low density, inert & reactive chemicals, porous and non-porous as well as top quality high value to low cost products

Working directly with Aqua-TECHNIEK BV we are fully aware of our responsibility in the knowledge that thousands of people are consuming potable water on a daily basis that has been treated by the products we offer. Therefore our demands regarding quality most of all are even more critical than customers' specifications. For any type of raw water we can offer the right products, sometimes it is necessary to design a filter with a combination of products where each of them is doing a different job. Our service includes all necessary assistance in order to come to the most perfect filter media for any specific filter or application.

SEWAGE TREATMENT

We offer a variety of sewage treatment solutions using a variety of techniques. Our factory packaged systems are well designed and user / environmentally friendly. Our solutions are ideal for main sewage networks, single family homes, small business, municipals, hotels, camps etc.

DISK DIFFUSER

LOWARA DUPER BOX

DOMO GRI

DOSING PUMP

GRINDER PUMPS

A grinder cuts solids in sewage into smaller bits that can easily pass through the impeller and discharge pipes. Risk of clogging/blockage is very low and the grinder system is easily adjustable. Delivery: Up to 6.60m3/hr @ 25m. Power supply: Both single & three phase, 50 & 60Hz. Power: 1.10kW. Temperature: Up to 35 degrees Celsius. Maximum Immersion Depth: 5m.

UPVC FITTINGS

UPVC (unplasticised PVC) fittings are rigid, corrosion-resistant and virtually maintenance-free, making them the standard choice for cold-water supply, irrigation and drainage networks. Our range covers the full pressure and drainage series in sizes from 20 mm to 400 mm, all manufactured to BS/EN and ISO standards.

HDPE FITTINGS

HDPE fittings deliver exceptional strength, flexibility and chemical resistance for demanding water and gas pipelines.

Joined by butt-fusion or electrofusion, they form fully welded, leak-free systems with a 50+ year service life. Corrosion-proof and UV-stabilised, they suit potable water, irrigation, mining and industrial networks — available in butt-weld, electrofusion and flange-adaptor types.

WATER TREATMENT ACCESSORIES

Our water-treatment accessories complete any purification system — from filtration and disinfection through to monitoring and regeneration. Every component is selected for reliability, easy servicing and compatibility with domestic, commercial and industrial installations.

Brine tank

Flowmeter

RO membrane

UV Sterilizer

BLOWERS

Having partnered with Dutair, Techno and Raico Germany Jemimah Nig. Ltd offers a range of hybrid compressor/ vacuum pump blowers that use a no contact process which eliminates wear and the need for lubrication. These blowers are highly versatile and can be used in numerous scenarios. They come with integral silencers and are built on pump housings that can be mounted in any position

FEATURES

- High pressure Ratio
- 100% Oil-Free Air
- IP54 Protection
- Class F insulation
- CE approved
- Aesthetically Appealing
- No, Vibration, and therefore complete Dynamic Stability
- Provided with inlet and outlet silencer / filter
- Low noise levels (65 dba, Normal, 85 dba Max.)
- 140% Overload protection
- +/- 10% Voltage fluctuation tolerance
- Pressure Die Casted Body, Impeller & Rotor
- Suitable for environmental protection

PRESSURE VESSELS AND BOILERS

Working closely with Elbi Thermohydraulics and ETNA, we provide state of the art boilers and pressure vessels. These top of the line machinations offer not only energy saving capabilities, but also reduced installation and maintenance costs as well as being long lasting, dual purpose (cushion water hammer). They also save on space occupied since they come in ergonomic sizes

FEATURES OF P. VESSEL

1. Working temperature: 10° / +99°C
2. Replaceable bladder in EPDM rubber & butyl
3. Water & air completely separate
4. No contact between water & tank inner surface
5. Sizes: 2 to 500 Litres

FEATURES OF BOILER

1. 10bar max working pressure
2. Polyurethane Insulation
3. Magnesium Anode
4. Suitable for solar systems
5. 5 years warranty

ASHIRVAD UPVC DROP/RISER/COLUMN FOR BOREHOLE PUMPS

Ashirvad Pipes Pvt Ltd, Bengaluru is a leading Manufacturer and Exporter of UPVC column pipes for use in boreholes with submersible pumps. Manufactured and developed with high tensile, high impact unplasticised PVC threaded pipes. These pipes are much more durable & efficient compared to the normal galvanized steel pipes

Inventors of Column Pipes

Ashirvad Pipes based in Bengaluru, India was the first in the world to design, develop and manufacture Column/Riser/Drop pipes using uPVC. Available in diameter 25mm to 160mm, these pipes are the ideal replacement for G.I and HDPE pipes and are recommended for installations up to 1200 ft. With submersible borehole

BIAX Technology for Extra Pipe Strength

This technique has been developed for the first time in India by Ashirvad Pipes wherein the uPVC molecular chain gets linearly and diametrically oriented during the process of installation. This results in higher impact strength.

More Than 2,500,000 Successful Installations

More than 2.5 million successful installations have taken place across the globe with Ashirvad Column Pipes. Ashirvad Column Pipes are made of uPVC and are non corrosive, hi-tech, hi-tensile pepes having a successful track record of over 20 years across the globe.

Used in 35 Countries

Ashirvad is the largest manufacturer and exporter of column pipes in the world and these pipes are exported to 30 countries . These pipes are being successfully used in erection of submersible borehole pumps up to depths of 1200 feet all over the world

PPR PIPES & FITTINGS

Working with The Kayalar Group (Turkey) and The Lesso Group (China). Jemimah provides various sizes and pressure specific Polypropylene Random Copolymer to the Nigerian Market. These products are ideal for hot and cold water supply systems as well as potable water applications and heating systems.

ADVANTAGES OF PPR

1. It can achieve a high level of flow than other pipes as such the power needed is less and reduces the cost of electricity
2. It is environmentally friendly
3. Lasts longer than other pipes.
4. It is heat insulated and can carry both cold and hot water
5. It is corrosion resistant

VALVES

Having partnered with a host of reputable valve manufacturers from around the world, we provide valuable valve solutions to the Nigerian market. We carry an extensive range of valve products that offer for each application perfectly suited valves for water, sewage, building services, power plants, industrial and oil & gas. All our valves are in line with international standards such as DIN, BS, ASME/ANSI & API

NON RETURN VALVE

HAND BIDET

KITCHEN PILLAR TAP

WATER STORAGE (GLASS/FIBRE REINFORCED PLASTIC SECTIONAL TANK)

- Our GRP Tank Panels are non-toxic and very safe for storage of treated water.
- The panels are also corrosion and ultra violet resistant. They also prevent the growth of micro organisms like algae within the tank. This is as a result of high opacity to sunlight the panels have.
- They are lightweight and make suitable roof tanks.
- They can also be mounted on basement / steel tower.

WATER STORAGE (PRESSED (MILD) AND STAINLESS STEEL TANK)

- We also offer both Pressed (mild) and Stainless steel Tanks (AISI 304 & 316)
- The steel tanks are versatile bulk storage containers of water. The construction process involves bolting up together the steel panels into various sizes and capacities.
- They can be mounted on basements, roofs / steel towers.

CONTROL PANELS

Partnered with Luigi Floridia (Italy), Techno (China) and Xylem's Lowara. We offer a vast range of electro-mechanical direct starters in single & three phase versions. The starters are ideal for numerous starts & stops of one or more electric motors. They also provide management of multi motor systems that run simultaneously or alternately, ensuring you get the best out of your motors by causing uniform wear of two or more machines working in parallel .

IN STOCK FEATURES

- 3HP up to 40HP
- Single & Three Phase
- 220V up to 400V
